

Non-Market Based Approaches to Address the drivers of Climate Change and Forest Loss

Side Event Thursday, June 12th, 13:15 – 14:45 Room Wind

The side event will discuss the need to develop effective policies to address the most important drivers of climate change, forest loss and unsustainable agriculture. It will focus on unsustainable livestock production as a key driver of land use change and greenhouse gas emissions in general.

Speakers include:

- Dr. Miguel Lovera, CEIDRA, Paraguay
- Geoffrey Orme-Evans, Humane Society International, USA
- Teresa Anderson, Action Aid, UK
- Hindou Oumarou, AFPAT/Indigenous Peoples of Africa Coordinating Committee, Chad
